(555) 010-2048 | Portland, OR

CANDIDATE SUMMARY

Principal AI engineer and agentic systems architect with 10+ years translating complex operational workflows into production AI systems. Own end-to-end technical strategy spanning agent harnesses, tool and data integration, context engineering, evaluation, guardrails, and production rollout. Convert individual use cases into reusable platforms and engineering standards that enable teams to deliver reliable AI experiences with measurable business impact.

EXPERIENCE

Northstar Health Technologies, Portland, OR, January 2024 - Present

Principal Machine Learning Engineer | January 2026 - Present

Senior Staff Machine Learning Engineer | January 2024 - December 2025

- Own the roadmap and architecture for a shared agentic platform adopted by multiple teams, standardizing harnesses, tools, context, guardrails, and reusable infrastructure.
- Architect internal and customer-facing AI experiences across product, engineering, support, chat, and voice workflows; reduced operator task-completion time by 24%.
- Established a company-wide evaluation platform with shared datasets, metrics, tools, and release gates; hired and mentored engineers in production agent design.

Orbit Labs, Remote, March 2022 - December 2023

Founding Machine Learning Engineer / Co-founder

- Owned the full ML product lifecycle from ideation through deployment and monitoring as the primary technical contributor.
- Engineered generative AI systems, reducing operating costs by 28% and increasing prototype speed by 3x.

Fieldbridge Systems, Remote, January 2021 - February 2022

Founding / Staff Machine Learning Engineer

- Built a retrieval-augmented support assistant integrating internal data sources and reducing resolution time by 27%.
- Designed and trained custom NLP models for marketplace quality control, improving accuracy by 19%.

Meridian Commerce, Portland, OR, June 2018 - December 2020

Applied AI Scientist

- Developed a distributed language-model system for organic keyword generation, improving impressions by 14%.
- Engineered an NLP retrieval recommender, increasing customer engagement by 17%.

Signal Works Consulting, Seattle, WA, September 2014 - May 2018

Founding Engineer & AI Consultant

- Delivered deep-learning solutions to clients in healthcare, agriculture, marketing, and insurance.
- Built and mentored ML teams, supporting technical excellence and sustainable leadership across industries.

TECHNICAL SKILLS

Agentic Systems Architecture, Agent Harnesses, Multi-Agent Orchestration, Context Engineering, Tool Use & MCP, Agentic RAG, LLM Evaluation & Observability, Guardrails & Human-in-the-Loop Systems, Voice AI, AI-Native Development, Full-Stack Engineering, Python, TypeScript, PyTorch, JAX, Hugging Face, Pydantic AI, Langfuse, Braintrust, Docker, Kubernetes, AWS, GCP, PostgreSQL

EDUCATION

Lakeview University | May 2014 | Doctor of Philosophy, Computer Science

Central State University | May 2008 | Master of Arts, Applied Mathematics

Central State University | May 2006 | Bachelor of Science, Information Systems
